What is Personal Information?

Personal information is defined as data that specifically identifies an individual such as a username, name, address, telephone number, e-mail address, or other external accounts, and information about that individual's activities when directly linked to that person such as knowledge about his or her use of Angielemar.com. Personal information also includes demographic facts such as date of birth, gender, geographic area and preferences when such data is linked to other personal information that identifies you individually.

As personal information is what makes you unique, it does not include "aggregate" information. Aggregate information is data we collect about a group or category of places, products, services or customers, from which individual customer identities have been removed. In other words, information about how you use a service may be collected and combined with information about how others use the same service.
